

Monitoring Violation

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for

Guadalupe Blanco River Authority PWS 0290005

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During February, 2024 we did not complete all monitoring or testing for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time. Please note that the only sample not collected was the one (1) sample from the water treatment facility. All other required coliform samples were collected and were negative for coliform organisms.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

We have instituted measures to ensure that this sample is collected every month. The sample was collected for the months prior and since the missed sample in February 2024.

For more information, please contact Undine Texas, LLC at 888-201-4314 or 17681 Telge Rd Cypress, Texas 77429.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Undine Texas, LLC. Public Water System ID#: TX0290005.
