

***Dear Undine sewer customers,***

***It is imperative that you do not pour grease or other fats down the drain!***

***Grease solidifies in the sewer and directly causes sewer overflows and backups into your homes.***

***The process and cost of cleaning grease out of the system certainly drives up our sewer costs and your rates.***

***Please see how grease impacts sewer systems at the TCEQ website below:***

***<https://www.tceq.texas.gov/assistance/water/wastewater/fog>***

***Sincerely,***

***Undine Management***
